

Roku IPTV: How to Install & Watch IPTV on Roku (2022)

Paying for cable is incredibly outdated. You've got to pay an expensive monthly fee, deal with the company coming to your house, and suffer from constant outages and other problems.

Fortunately, if you've got a Roku, you can get the best of live television without needing a set-top box, thanks

to IPTV on Roku.

How to Install IPTV on Roku With a Simple Trick

This tutorial provides step-by-step instructions to install IPTV on Roku. Using a Roku device, we must "sideload" IPTV on the Roku device. The instructions below will require the use of a computer in order to download the IPTV app file and add it to your Roku streaming device.

If you are using another IPTV player such as TiviMate, you can also watch IPTV on Roku by casting to your Roku device. IPTV Smarters is one of the best IPTV Players, compatible with hundreds of IPTV services that use a server URL.

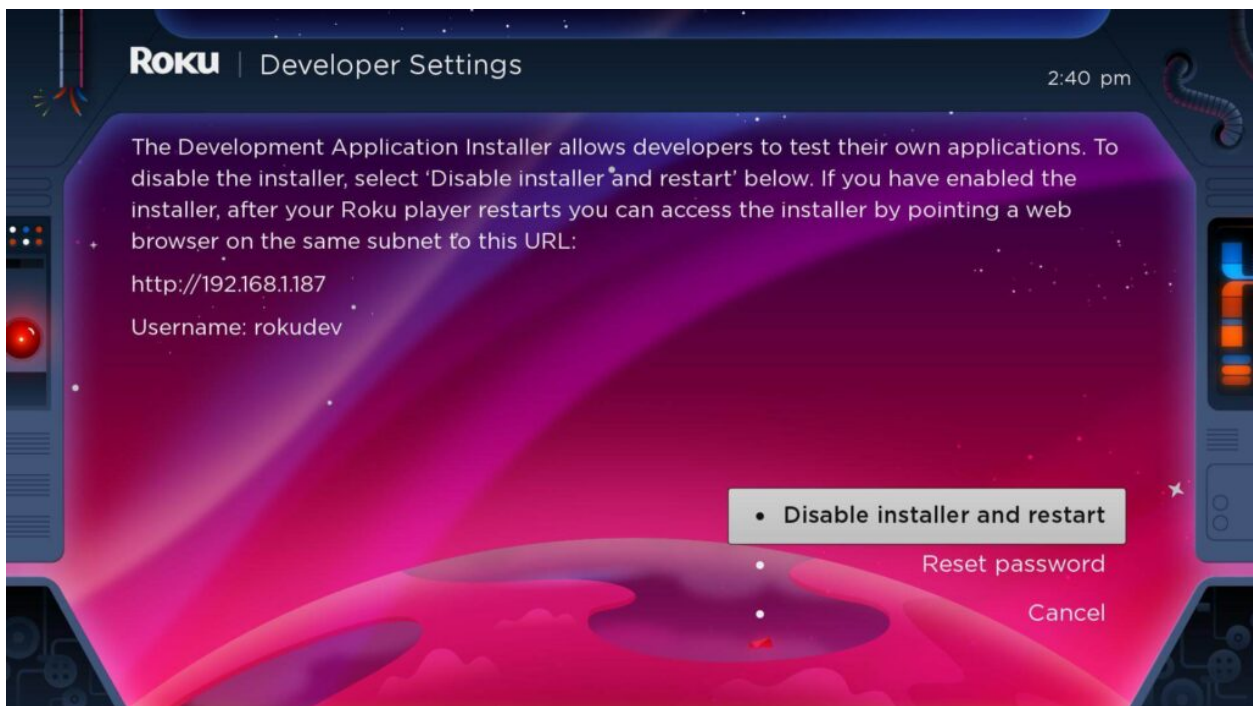

Anyways, let's get into how to install IPTV on Roku. I divided the instructions into four parts to make them easier to follow:

- Part 1: Enabling developer options on Roku
- Part 2: Adding the IPTV Smarters channel
- Part 3: Downloading the IPTV Smarters package on your computer
- Part 4: Installing IPTV Smarters on Roku

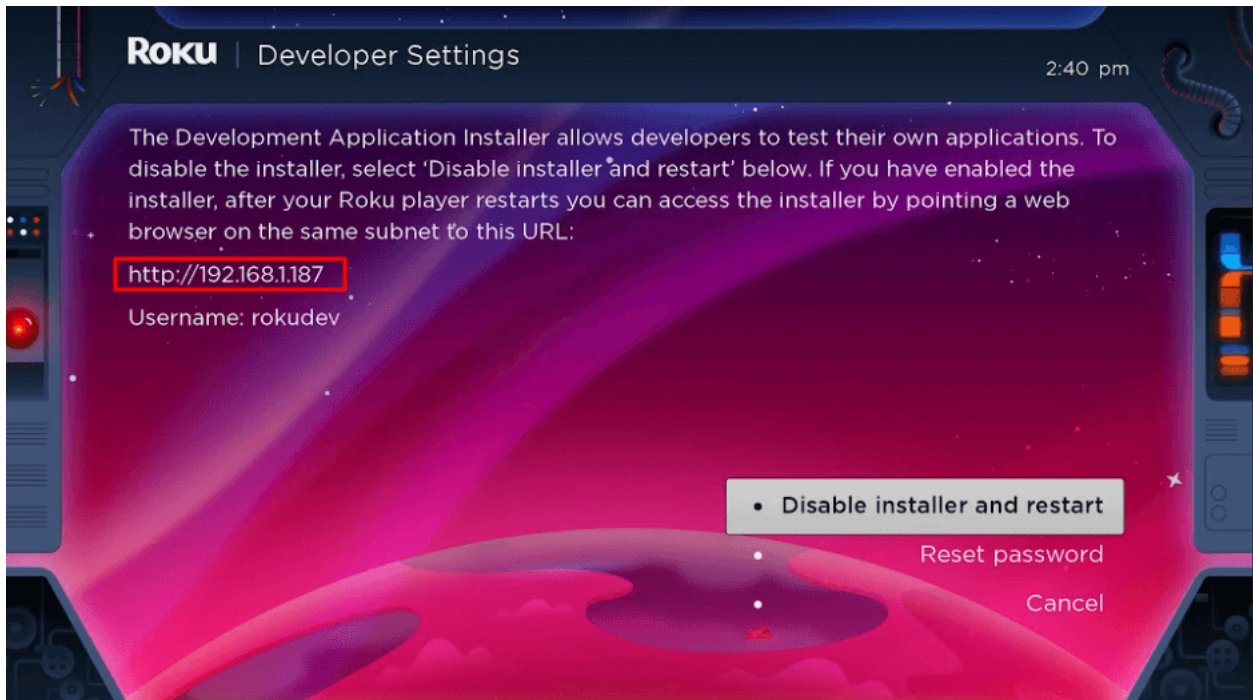

Don't worry, the process is easier than it sounds. Let's begin.

Enable Developer Options on Roku

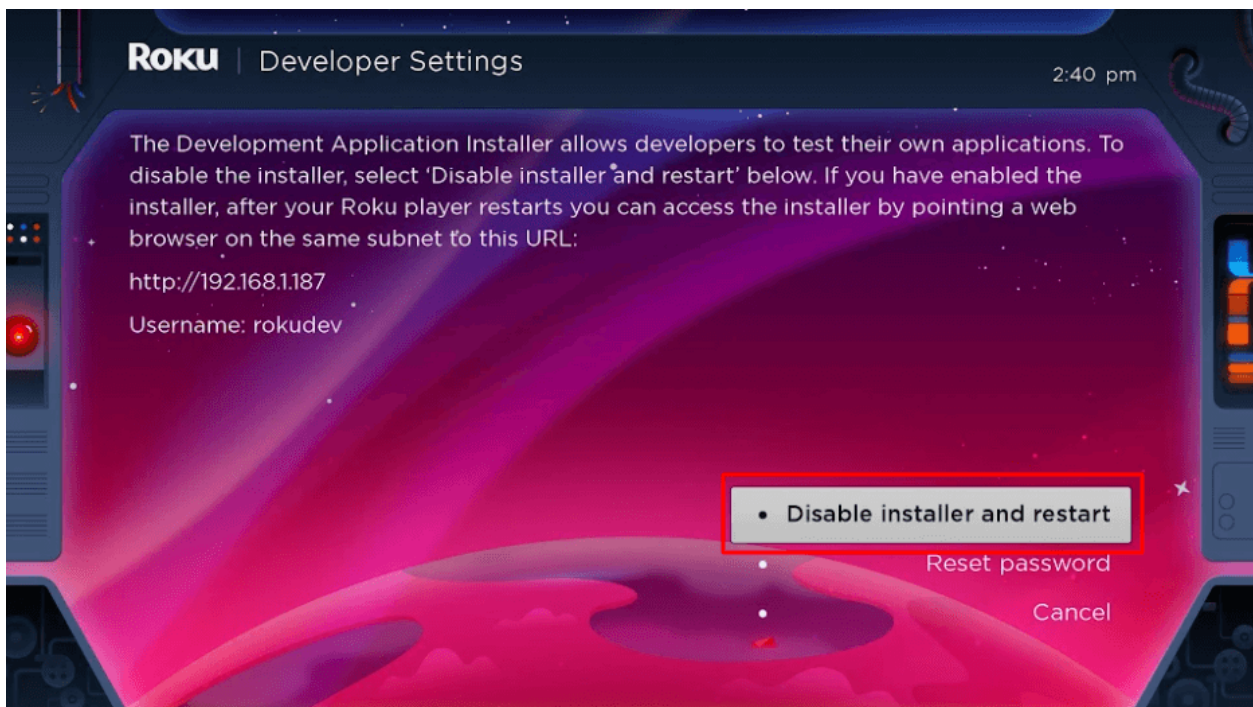

1. Launch your Roku by switching to its HDMI input on your television.
2. Grab your Roku remote and press the following buttons in this order: **Home Button x3, Up Arrow x2, Right Arrow x1, Left Arrow x1, Right Arrow x1, Left Arrow x1, Right Arrow x1.**
3. If done correctly, the developer options menu will appear on your Roku TV screen.

4. Write down the **IP address** listed on the screen.

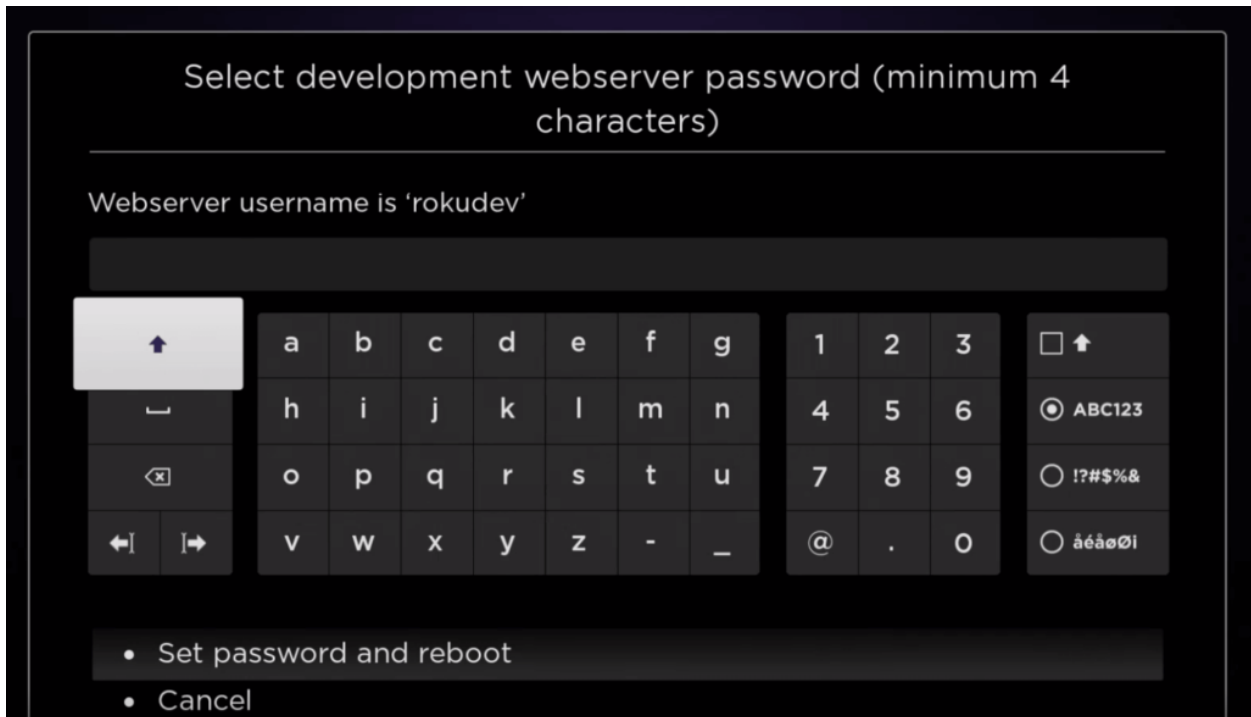

5. Select **Enable installer and restart** (mine says Disable because I've already done this).

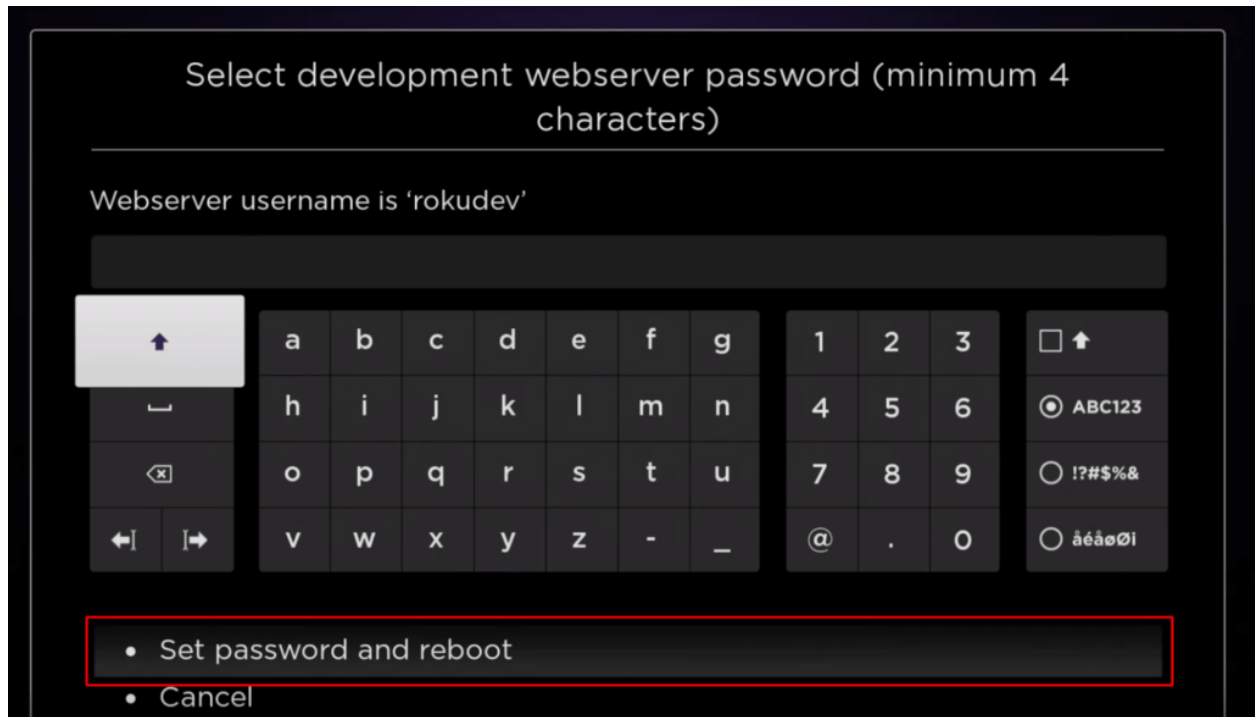

6. Scroll through the Developer Tools License Agreement and select **I Agree**.

7. Create a **webserver password** using the keyboard that appears. You will need your webserver password for a later step.

8. Select **Set password and reboot**.

Part 2: Add IPTV Smarters Channel

1. Head to your computer and navigate to my.roku.com using any browser.
2. Type in your **username** and **password** for your Roku account, and click **Submit**.

Welcome to your Roku account

Sign in to your Roku account

Create a Roku account

A Roku account gives you access to an amazing selection of movies, TV shows, music and more from the Roku Channel Store.

Create account

3. Once logged in, select **Add channel with a code**, under **Manage account**.

Manage account

[Add channel with a code](#)

Enter an invitation code to add a non-certified or beta channel to your account. Don't have code? There are thousands of entertainment options in the [Channel Store](#).

[Manage your subscriptions](#)

View and manage your Roku-billed subscriptions.

[Voice settings](#)

View and manage your voice settings.

[Deactivate account](#)

Close your Roku account and unlink your devices.

[View your purchase history](#)

See past purchases and invoices.

[Communication center](#)

View and manage your email settings.

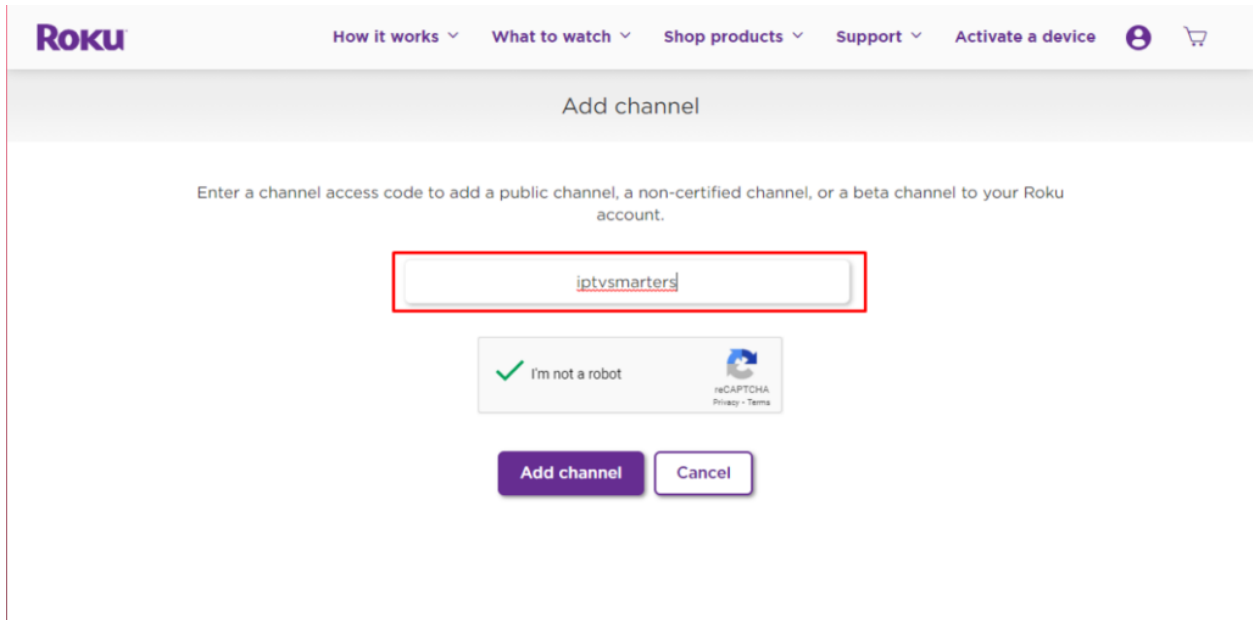

[View & activate free trial offers](#)

View and activate exciting offers from Roku Partners.

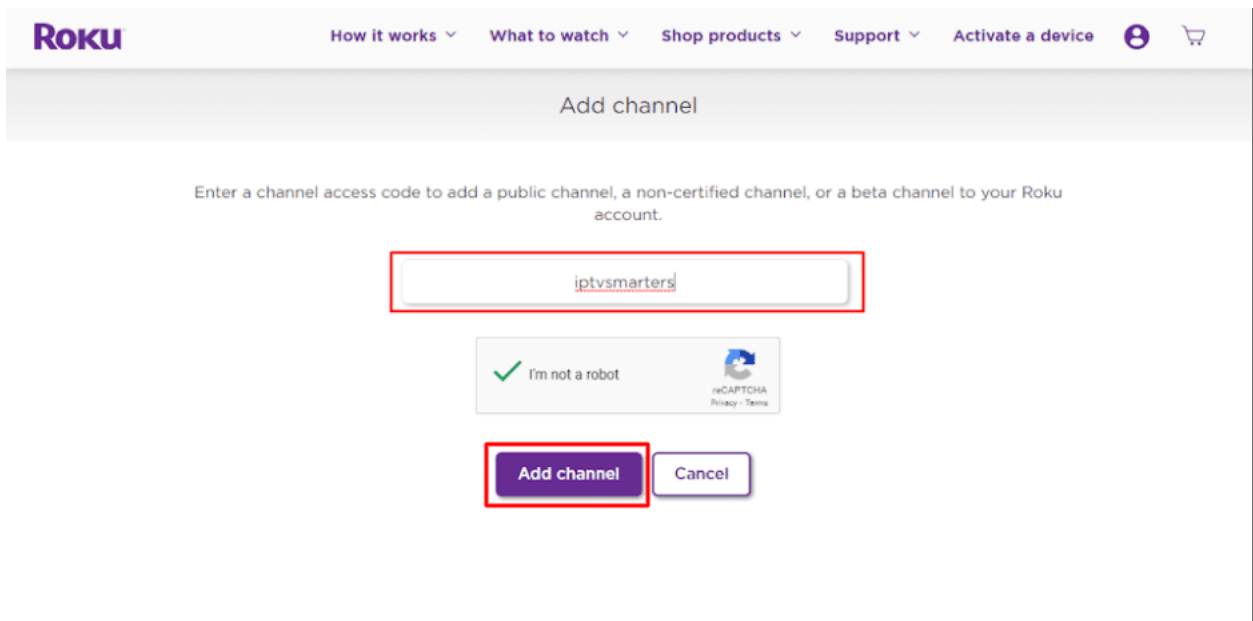

[Guest Mode](#)

Have guests? Guest mode lets your visitors log in and enjoy their own subscription channels on your Roku device. You can select the date of departure and they'll be automatically signed out on that date.

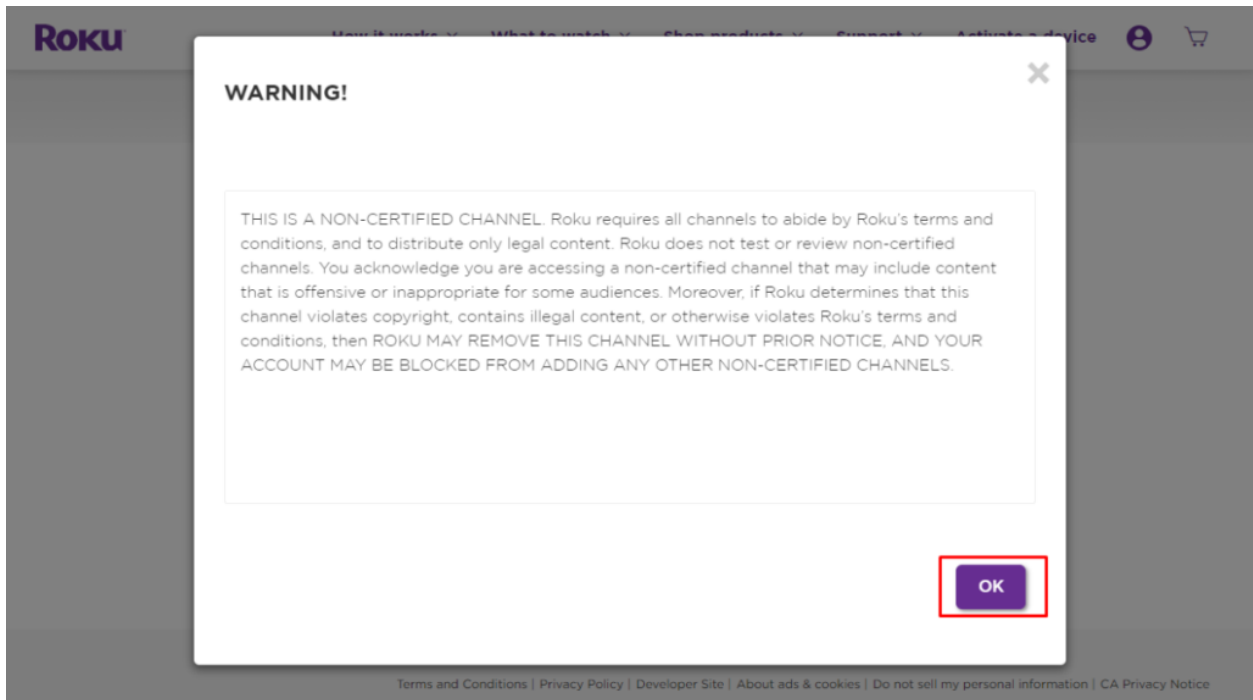

4. Type **iptvsmarters** into the box. Make sure you've typed it exactly as shown.

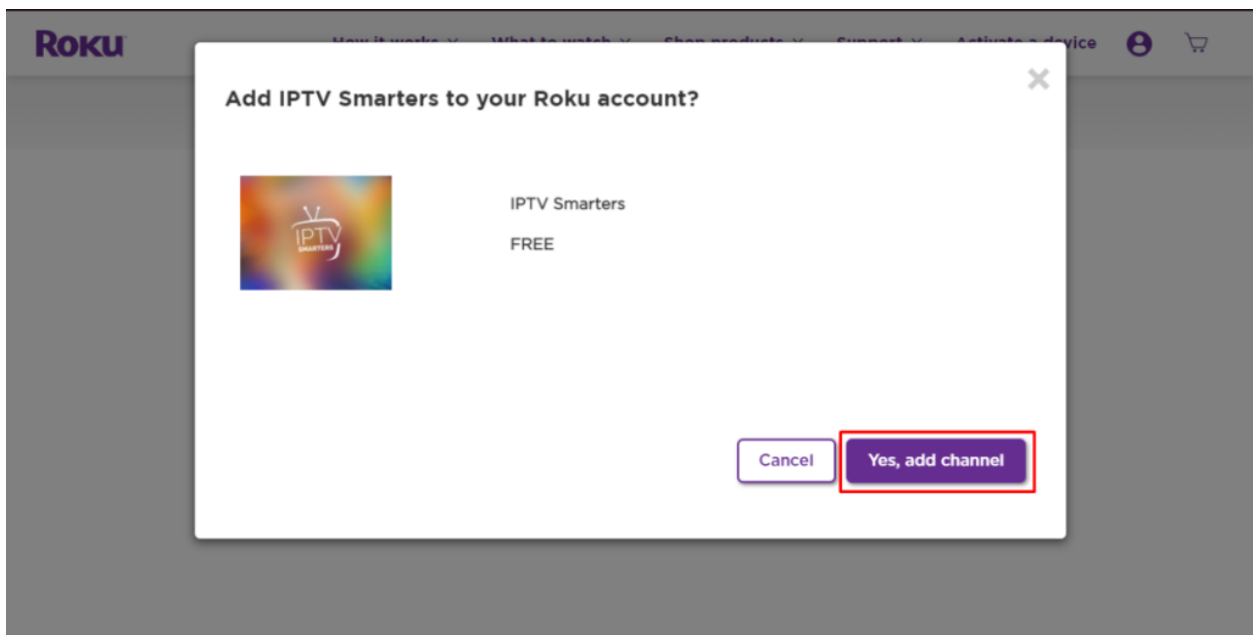

5. Select **Add Channel** to add it to your Roku.

6. Click **OK** on the warning message that appears.

7. Select **Yes, add channel** on the following popup.

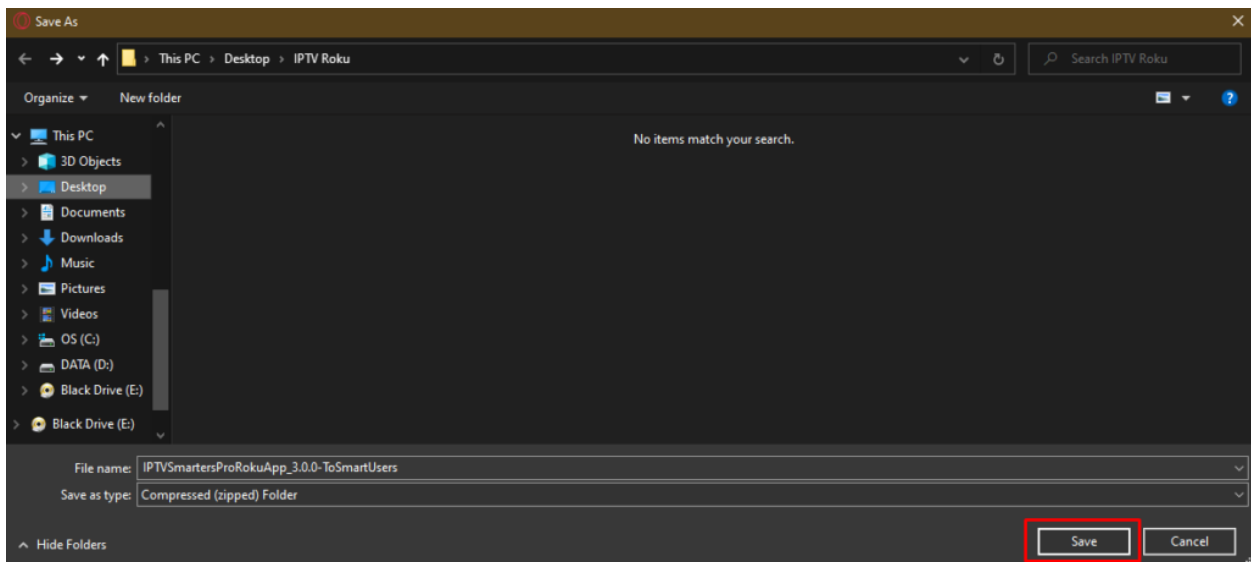

Part 3: Download IPTV Smarters Package on Your Computer

Now, it's time to download the IPTV Smarters file onto your computer.

1. Head to this link on your computer and the download should start automatically: <http://bit.ly/rexlantvroku>

Note: RexLAN Media doesn't host or distribute this APK. The link leads to the site where it's hosted.

2. Save the IPTV Smarters package somewhere accessible on your computer (you'll need to browse to this location in a moment). I'm going to save it on my **Desktop**.

Part 4: Install IPTV Smarters on Roku

1. On your computer, open any browser. In the address bar, enter the **IP address** from your Roku that you wrote down earlier.

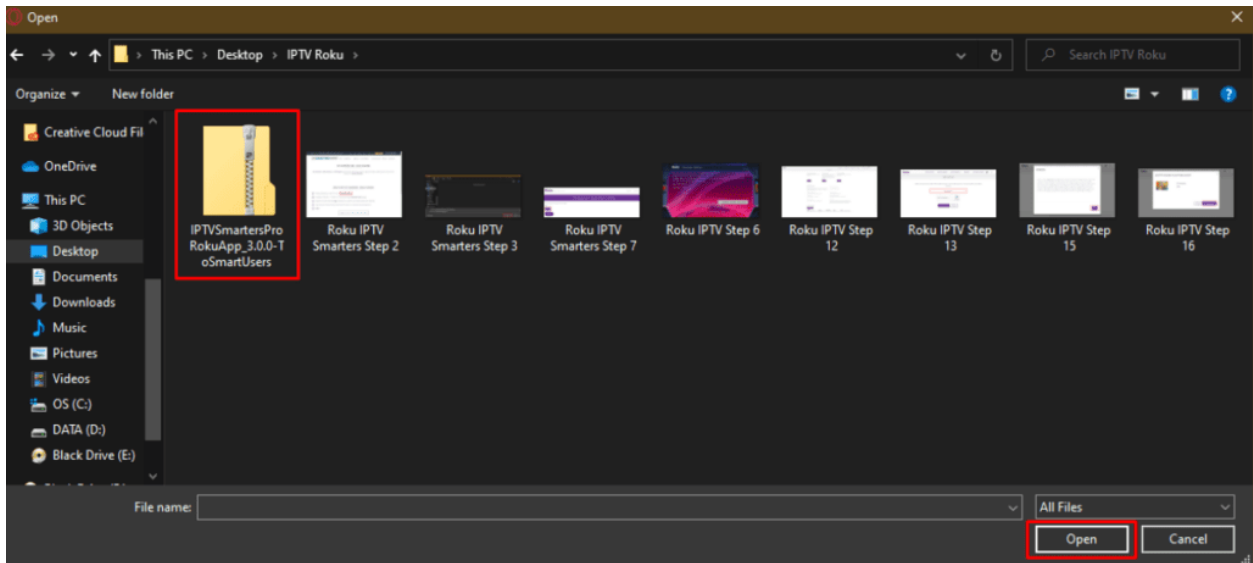

2. A sign-in box will appear. Type **rokudev** as the **Username**. For the **Password**, type in the **webserver password** you created earlier. Finally, click **Sign in**.

3. Click **Upload** on the next page.

4. Browse to the location where you downloaded the IPTV Smarters package (mine was my **Desktop**). Select the downloaded folder and click **Open**.

5. Click **Install** once the file is uploaded.

6. If you see this screen, you've done it correctly!

Development Application Installer

Currently Installed Application:

7. Head back to your Roku device, and IPTV Smarters will be on the television.

The image shows a login screen for IPTV Smarters Pro. On the left is the logo, which consists of a television set with two antennae and the text 'IPTV SMARTERS PRO' below it. The background is a colorful, abstract brushstroke pattern. On the right, the text 'Enter Your Login Details' is centered above three input fields: 'Username', 'Password', and 'http://urlhere.com'. Below these fields is a white 'LOGIN' button. At the bottom right, there is a checkbox labeled 'Remember me'. At the bottom left, there is a note: 'Request Username/Password and URL from your TV Service Provider.' At the bottom center, there is a disclaimer: 'By using this application, You must agree to our terms and conditions : <https://www.iptvsmarters.com/terms-and-conditions/>'

8. Simply log in with your IPTV Smarters information and you're in! If you don't have the server address or your login address please contact RexLan TV support and someone will assist you.
